

APP BRAND PACK

Source-constrained extraction from the public PMI Brand Style Guide page and visible cover preview.

Prepared for app design handoff

PMI naming, visible logo/tagline, and unavailable specifications are preserved as source limits.

PMI Brand Style Guide - 071525

Publisher shown: Property Management Inc.

Published: October 11, 2024

Visible cover label: Brand Book / Style Guide

Reference rendering only; official production artwork was not available from extracted assets.

Source Summary

What was available, what was extracted, and how this pack should be used.

Source constraint Exact values and rules are included only when visible in the available PMI source. Unavailable items are explicitly marked.

Confirmed publication facts

- Title visible in page shell: PMI Brand Style Guide - 071525
- Publisher visible in page shell: Property Management Inc.
- Publication date visible in page shell: October 11, 2024

Confirmed visible cover facts

- Black cover background with orange graphic mark
- Lowercase wordmark visible as pmi.
- Tagline visible as the property management people
- Cover labels visible as Brand Book and Style Guide

Extraction boundary

- Full internal flipbook spreads were not exposed through the available extraction path
- Exact brand colors, typefaces, clearspace, and accessibility rules were not visible
- This document avoids guessed specifications

Design benchmark usage

The attached reference PDF influenced the clean presentation format: large section titles, accent bars, swatch cards, callouts, footers, and page numbering. No reference brand content was used as PMI content.

Logo System

Visible lockup elements and source-safe implementation notes.

Visible cover reference

Recreated from visible cover for reference only. Use official PMI vector artwork for app production.

Visible elements

- Orange angular icon
- Lowercase pmi. wordmark
- Orange tagline

Exact wording

- pmi.
- the property management people
- Brand Book / Style Guide

Not specified

- Clearspace
- Minimum size
- Alternate lockups
- One-color rules

App implication

- Keep a high-contrast lockup zone
- Do not redraw for release assets
- Avoid color/value substitutions until official tokens are obtained

Production rule This PDF is a design handoff scaffold. It does not replace official logo files or full brand-guide rules.

Color Palette

Only visually observed color roles are documented; exact official values were not available.

Cover black

Observed role: primary cover/background

Exact value: not specified

Logo white

Observed role: pmi. wordmark on black cover

Exact value: not specified

PMI orange

Observed role: icon, tagline, accent rules

Exact value: not specified

Developer caution

Do not create production design tokens from this page. The fills used in this PDF are approximations for presentation only, not PMI HEX, RGB, CMYK, or PMS values.

Color Usage for App UI

Source-safe guidance inferred from the visible cover, not from complete color specifications.

High-contrast brand moments

- Use the black/orange/white identity for launch, sign-in, hero, and brand transition screens
- Keep body UI quieter than the cover moment

Orange as active signal

- Supported visual role: icon/tagline/accent
- Use for key actions only after official contrast values are validated

Neutral app surfaces

- Use plain white or neutral surfaces for long tasks, forms, and tables
- Avoid heavy black backgrounds for dense operational workflows

Token status

- brand.orange: not specified
- brand.black: not specified
- brand.white: observed, exact spec not provided

Practical app guidance is derived from visible usage only; replace approximations with official PMI tokens before implementation.

Typography

Official PMI typefaces were not visible in the available source extraction.

SOURCE STATUS

Not specified in the available source

The page shell and visible cover preview did not expose official PMI font names, weights, sizes, or hierarchy rules. Do not infer the complete typography system from the cover image.

App handoff

Use official PMI typefaces when obtained. Until then, keep any working app prototype typography explicitly labeled as non-brand fallback.

Implementation fallback example

Screen Title

Section label

Readable body text for app tasks, forms, and status messages. This is not a PMI font specification; it is a usability placeholder.

Primary CTA

Fallback font: not a PMI brand fact

App-Facing Components

Representative application of the available identity cues.

Component guidance

Splash / launch	Use visible black/orange/white identity as a brand moment.
Top navigation	Keep compact. Avoid unverified logo variants or redrawn marks.
Primary actions	Orange may act as the brand accent; validate contrast first.
Forms / tables	Use neutral surfaces and clear typography; official fonts not specified.
Design tokens	Create placeholder tokens only; leave values unset until official specs are obtained.

Graphic Language

Observed graphic cues and what remains unspecified.

Observed angular mark

The cover uses a sharp orange symbol and restrained horizontal rules. Full graphic motif rules were not accessible.

Supported

- Angular orange symbol
- Black field
- White lowercase wordmark
- Thin cover rules

Not specified

- Icon set
- Illustration style
- Pattern library
- Motion behavior

App use

- Use angular brand motif only as a restrained accent or transition
- Do not over-pattern operational screens

Asset rule

- Use official files for icons and marks when available
- Do not trace the preview for release assets

Imagery, Tone, Accessibility

Unavailable guide sections are marked rather than reconstructed.

Imagery

- Not specified in the available source
- No photography rules, image treatments, or subject-matter guidance were visible
- Do not infer image style from unrelated PMI sources

Tone of voice

- Not specified in the available source
- Visible tagline only: the property management people
- No copywriting principles or messaging hierarchy were available

Accessibility

- Not specified in the available source
- No contrast ratios, alt-text rules, or UI state guidance were visible
- Validate all app colors independently before release

App implication

Build the app with accessible product defaults now; replace visual placeholders only when official PMI typography, palette, imagery, and accessibility requirements are obtained.

Do / Don't Guidance

Conservative rules for a source-constrained PMI app brand implementation.

Do

- Use the exact visible name styling pmi. when referencing the visible wordmark.
- Preserve the tagline wording: the property management people.
- Treat orange, black, and white as observed visual roles only until exact specs are obtained.
- Use official logo artwork for production app assets.
- Keep unavailable brand specs clearly marked in design tickets.

Don't

- Do not publish approximate fills as PMI HEX/RGB/CMYK/PMS values.
- Do not invent typefaces, spacing, clearspace, gradients, icons, or imagery rules.
- Do not redraw the preview logo for app release builds.
- Do not mix this visible identity with unrelated or legacy marks without source support.
- Do not overuse the dark cover treatment for dense functional screens.

Handoff Checklist

What app teams can use now, and what still requires official PMI source material.

Usable now Publication identity: PMI Brand Style Guide - 071525 / Property Management Inc.

Usable now Visible cover lockup reference: pmi. + tagline + orange angular mark.

Use with caution App mockups may use approximated black/orange/white fills for conversation only.

Needed before release Official logo files and usage rules.

Needed before release Official color specifications and accessibility-confirmed UI tokens.

Needed before release Official typefaces, iconography, imagery, and motion/graphic rules.

Limitation note The accessible Flipsnack page shell and visible cover asset did not provide full interior brand-guide specifications.

Sources & Limitations

A concise record of source material used for this PDF.

PMI source material used

- Flipsnack publication page shell: title, publisher, publication date.
- Visible cover preview: orange angular icon, lowercase pmi. wordmark, orange tagline, black cover field, Brand Book / Style Guide label.
- Public full-view page extraction: cookie/banner shell only; no reliable interior page text, official color values, or typeface rules were exposed in the available extraction workflow.

Reference PDF usage

- Attached Cherry Bridge guide used only as visual structure benchmark: section titles, spacing, swatches, callouts, footers, and page numbers.
- No reference brand names, palette values, fonts, gradients, or wording were used as PMI content.

Final status: publication-ready source-constrained brand pack; not a substitute for the complete official PMI brand guide files.
